the records as expected. The sorting toggle behaviour (ascending/descending) is not applied, and the list remains in the same order.

Sorting should allow users to organise budget records alphabetically or by creation date, but currently this functionality appears

5. Click the Name /Created On column header again.

record s by date.

3. The list order remains unchanged.

4. Sorting toggle indicators may not appear or may not affect the list order.

→ earliest depending on default)

- Second click → Toggle the order.

The list order should update accordingly and the **sort indicator icon should reflect the active sorting direction.**

|   | Module | Feature              | Attac<br>hmen<br>t                                                                  | Improvements &<br>Suggestions                                                                                                                                                                                                                                                                                                                       | Remarks                                 |
|---|--------|----------------------|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| 1 | Budget | Budget → Detail View |    | <b>Move the section title “Expense Type (single)” above the table header.</b><br>Currently the title appears inside the first row of the table, which can confuse users about whether it is a column label or a section heading. Placing it above the table (aligned with the budget section title) would improve visual hierarchy and readability. | UI/UX improvement for clearer structure |
| 2 | Budget | Budget → Detail View |  | <b>Relocate the “+” button used to add new expense types to a separate row or below the expense list.</b><br>Currently the button appears beside the last expense item (“Salaries”), which may confuse users into thinking it only applies to that row. Placing the button below the list or                                                        | UI/UX improvement                       |

|   |        |                                   |                                                                                   |                                                                                                                                                                                                                                                                                                                                          |            |
|---|--------|-----------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
|   |        |                                   |                                                                                   | adding a label such as <b>“Add Expense Type”</b> would make the action clearer and improve usability.                                                                                                                                                                                                                                    |            |
| 3 | Budget | Budget → Status                   |  | <b>Status management missing.</b> Budgets should progress through <b>Open → Closed → Locked</b> statuses, with editing disabled for closed/locked budgets. The list always shows the status “OPEN,” and there are no actions to close or lock budgets or to prevent editing accordingly.                                                 | Functional |
| 4 | Budget | Budget → Detail View → Add Amount |                                                                                   | <b>No feedback when entering &gt;2 decimal places.</b> Amount fields silently prevent entering more than two decimal places. The spec does not explicitly restrict decimals, and the absence of an error message may confuse users. A validation error such as “Amount must be a valid number with two decimal places” would be clearer. | Validation |
| 5 | Budget | Budget → Detail View → Add Amount |                                                                                   | <b>Negative or non-numeric input prevention with no explanation.</b> Users cannot type negative numbers or alphabetic characters in amount fields, but there is no notification. The                                                                                                                                                     | Validation |

|   |        |                                       |                                                                                     |                                                                                                                                                                                                                                                                                                                               |  |
|---|--------|---------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|   |        |                                       |                                                                                     | specification requires showing an error message when a negative amount is entered.                                                                                                                                                                                                                                            |  |
| 6 | Budget | Budget List View → Budget Name Column |    | In the Budget list view, when the budget name is long, the text is truncated with “...” and the full name is not visible. It is recommended to display the <b>full budget name in a tooltip when the user hovers over the truncated text</b> . This allows users to quickly see the complete name without opening the record. |  |
| 7 | Budget | Budget Summary                        |  | <b>Add a summary section showing monthly totals and yearly total at the bottom of the table.</b> This would allow users to quickly review the total planned budget per month and overall fiscal year.                                                                                                                         |  |
| 8 | Budget | Budget Details → Search / Filter      |  | <b>Add a search bar to quickly find expense rows within the budget table.</b> When a budget contains many expense items, users may find it difficult to locate a specific expense, expense code, or category by scrolling manually. A search bar would allow users to filter rows instantly                                   |  |

|    |        |                             |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                      |  |
|----|--------|-----------------------------|-----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|    |        |                             |                                                                                   | and improve efficiency when reviewing or updating budget data.                                                                                                                                                                                                                                                                                                       |  |
| 9  | Budget | Budget List View → Search   |                                                                                   | <b>Reset filters easily:</b> Add a clear/reset button next to the search field and filters to restore default view. Clearing the search field should automatically reload all budgets.                                                                                                                                                                               |  |
| 10 | Budget | Budget Table → Month Header |  | <b>Add a sticky header for the month columns when scrolling vertically.</b><br>Currently, when the budget table becomes long and users scroll down, the month labels (January–December) disappear. Making the header sticky would ensure the month names remain visible while editing values, helping users clearly identify which month they are entering data for. |  |
| 11 | Budget | Budget Details              |                                                                                   | <b>Lack of unsaved-changes warning</b> – navigating away from the details view loses unsaved data without a confirmation dialog. A confirmation prompt would prevent accidental loss of changes.                                                                                                                                                                     |  |
