

Test Cases Rental Asset Center

This document contains a comprehensive set of test cases for the **Rental Asset Center** module of the Exsited platform. The module manages rental assets (vehicles, equipment, spaces, etc.), defines rental asset profiles (pricing, availability, working hours) and integrates with the Order system for booking rentals. These test cases are designed using instance:

<https://dev.exsited.com/rental-asset-center> with logins: implementer@42f19261.local
