

Standardized QA Issue Report Template for Software Defects

QA Issue Report Template

Overview

This document provides a standardized QA Issue Report Template used to document, track, and communicate software defects identified during testing activities.

The template is designed to help Quality Assurance (QA) engineers, testers, developers, and product teams record issues in a structured and consistent format. By using a unified issue reporting structure, teams can improve defect tracking, facilitate efficient communication between QA and development teams, and ensure that issues are properly analysed and resolved.

This template captures key information required for effective issue management, including:

- Issue identification details
- Module and environment information
- Steps to reproduce the issue
- Expected and actual system behavior
- Severity and priority classification
- Supporting evidence such as screenshots or logs
- Additional remarks for investigation

The template is suitable for use in manual testing workflows, bug reporting processes, and defect management systems such as Jira, Azure DevOps, or other issue tracking tools.

It can be used across different environments including Development, Stage, UAT, and Production, ensuring that defects are consistently documented throughout the software development lifecycle (SDLC).

This reusable template supports:

- Clear defect documentation
- Efficient issue triaging
- Improved collaboration between QA and development teams
- Traceability of issues during testing cycles

The structure of this template follows common industry QA reporting practices, making it suitable for professional testing documentation and software quality management processes.

 Issue Report

 Issue Overview

Field	Details
Issue ID	Q-XXX
Issue Title	Short descriptive title of the issue
Module	Quote / Job / Booking / Revision / Approval / Dashboard / Integration
Environment	Development / Stage / UAT / Production
Severity	Critical / High / Medium / Low
Priority	High / Medium / Low
Status	Open / In Progress / Fixed / Retesting / Closed
Reporter	Anoma Rathnayaka
Assigned To	Frontend / Backend / API / Integration / Unassigned
Date Reported	DD-MM-YYYY
Build Version	Version / Release Number

 Issue Description

Provide a clear explanation of the issue and the business impact.

Example:

Customers are able to view Draft quotes before confirmation. According to the system's business rules, Draft quotes should remain internal and only confirmed quotes should be visible to customers.

◆ Preconditions

Describe any required setup before reproducing the issue.

Example:

- Admin account exists
 - Customer account exists
 - Quote module enabled
-

◆ Steps to Reproduce

Step	Action
1	Login as Admin
2	Create a new Quote
3	Leave the status as Draft
4	Logout and login as Customer
5	Navigate to Quotes List

◆ Actual Result

Describe what currently happens in the system.

Example:

Draft quote is visible to the customer in the Quotes list.

◆ Expected Result

Describe the correct system behavior.

Example:

Draft quotes must not be visible to customers. Only confirmed quotes should appear in the customer dashboard.

◆ Attachments / Evidence

Evidence	Description
Screenshot 1	Customer view showing Draft quote
Screenshot 2	Admin quote status
Console Logs	Optional
API Response	Optional

◆ Additional Notes / Remarks

Example:

- Business rule violation
- Possible backend filtering issue
- API may be returning incorrect quote visibility status

❖ QA Issue Log Table

This table is used for tracking multiple issues.

ID	Module	Issue Title	Steps Summary	Actual Result	Expected Result	Attachment	Status	Environment	Reporter	Assigned Dev	Remarks
Q-001	Quote	Draft quote visible to customer	Create Draft quote → Login as customer	Draft quote visible	Draft quotes must not be visible	Screenshot	Open	Stage	Anomara Rathnayaka	Backend	Visibility rule issue
Q-002	Invoice	Invoice	Click downl	No file	PDF should	Screenshot	Open	UAT	Anomara	Backend	File gener

		downl oad not worki ng	oad button	downl oaded	d downl oad				Rathn ayaka		ation issue
--	--	------------------------------------	---------------	----------------	-------------------	--	--	--	----------------	--	----------------

Severity Definition

Severity	Description
Critical	System crash or complete feature failure
High	Major functionality not working
Medium	Partial functionality issue
Low	Minor UI issue

Priority Definition

Priority	Description
High	Must be fixed immediately
Medium	Should be fixed in next release
Low	Minor improvement
